Cloud-obsessed Full Stack developer returning to the world of coding after a brief stint in infrastructure guidance. Over 3 years of experience using Javascript, HTML, CSS, and ReactJS to build cloud-integrated customer demos and personal projects. Passionate about modular code, distributed systems, serverless solutions, and the journey of never-ending learning.

### Skills

|                  |   |
|------------------|---|
| <b>Front End</b> | HTML/CSS, JavaScript, React.js              |

| <b>Testing</b>   | Mocha.js, Chai.js                           |
| <b>Databases</b> | MySQL, PostgreSQL, Amazon DynamoDB, MongoDB |
| <b>DevOps</b>    | Docker, Kubernetes, Amazon Code Suite       |
| <b>SDLC</b>      | GitHub, Amazon CodeCommit                   |

### Work History

#### 2018 - Present Solutions Architect

##### *Amazon Web Services (AWS)*

- Used AWS services such as Lambda, Batch, EC2, SQS, and S3 to build and present demos to customers according to their business requirements
- Built CI/CD pipelines for version control and to maintain code bases for internal projects using native AWS services
- Provided AWS architectural guidance and best practices in a customer-facing role to over 30+ customers
- Leveraged HTML/CSS/JavaScript expertise for various internal projects and demos

#### 2017 - 2018 Freelance Web Developer

##### *Amber Simone - Makeup Artist*

- Designed and developed initial mockup/wireframe for website using Sketch.io/HTML/CSS
- Redeveloped website using React.js with routing and Bulma CSS
- Deployed static website with Amazon S3/Amazon CloudFront/Amazon Route 53

#### 2015 - 2017 Freelance Web Developer

##### *Mind Muscle Connection*

- Developed/built company site using Wordpress platform (PHP, HTML/CSS)
- Setup and configured MySQL product database through GoDaddy platform
- Managed e-commerce business solutions and advised on best practices of Wordpress
